Customer Class	Monthly Flow	Approved Rate/ 100 CF	Current Rate/ 100 CF
Commercial	Billable Flow in excess of REUs allocated or purchased	\$3.95	N/A
Industrial	Billable flow in excess of REUs allocated or purchased	\$3.95	N/A

IMPACT FEE

(Formerly named: Capacity Fee and Availability Fee)

All new connections to the system shall be subject to an Impact Fees. Impact fees, also referred to as privilege fees, infrastructure fees, availability or capacity fees, are a method of partially financing new wastewater treatment facilities and wastewater trunkline extensions in areas of substantial growth. The cost of these improvements is shared proportionately by new users. Impact Fees vary and are proportional to the expected volume of wastewater discharge. These charges are determined individually by the District's staff at a rate of \$1,600 per REU (Residential Equivalent Unit which is defined as a discharge of 300 gallons per day). Expected discharge volumes of greater than 300 gallons per day are calculated at the same rate of \$1,600 per 300 gallons per day. The minimum Impact Fee is \$1,600.00

CONNECTION FEE

(Formerly named: Tap Fee or Transmission Fee)

All new connections to the system shall be subject to a Connection Fee of **\$1,100.00 (no change)**

INSPECTION FEE

Inspection fees for new construction and abandonments District wide **\$125.00**

All low-pressure Pump Inspections District wide **\$250.00.**

Re-Inspection Fee District wide additional **\$150.00**
(New connections, abandonments, low pressure pumps)

VIDEO INSPECTION FEE

As requested by customer in response to a private sewer service emergency request District-wide. **\$325.00**

LOW PRESSURE PUMP MAINTENANCE FEE

(Formerly named: Grinder Pump Fee)

All low-pressure pump maintenance District wide **\$19.22/ month**

SEPTIC TANK WASTE effective April 1, 2023

In-District septic tank waste received from approved septage tank haulers at Wilson Creek WWTP.

Per truckload delivered: **\$195.00**

PRETREATMENT SURCHARGE RATE SCHEDULE

Surcharges:

For all users who discharge wastewater in excess of domestic strength. The surcharge billing is based upon the number of pounds of BOD₅ and the number of pounds of TSS above specified maximum concentration (300 ppm BOD₅ and 300 ppm suspended solids).

Similarly, the surcharge billing will apply for oil and grease (O & G) for concentrations above 100 ppm.

	Surcharge Rates:	\$ 0.552	301-900 mg/l per pound
BOD ₅		\$ 0.828	901-1200 mg/l per pound
BOD ₅		\$1.106	1200 + mg/l per pound BOD ₅
		\$0.424	per pound TSS
		\$0.289	per pound Oil & Grease

Effective Date: July 1, 2016

CF: Cubic Feet

REU: Residential Equivalent Unit
